Personal Statement

I am a Fullstack JavaScript Developer with 1 year of experience in the industry As a Technical Mentor. I am passionate about coding and eager to bring my skills to a dynamic and forward-thinking team. My expertise in frontend and back end development, combined with my ability to quickly learn new technologies, make me an ideal candidate for any Full stack role.

Highlighted Projects

Contributor, Wilco/Anythink

URL: https://github.com/ObelusFamily/Anythink-Market-46nd4ijh

The objective of this project is to improve my skills towards working with teams and contributing to open source projects.

Wilco is a platform that allows developers to reduce the lack of experience gap by contributing to a company codebase (Not a real company)

- Debug both backend and frontend code and squashing the branch after code reviews
- Contribute to the code base that has docker integrated, ReactJS, ExpressJs and MongoDB

Contributor, FoodRecipe

URL: https://github.com/Awadh-Awadh/FoodRecipe

The objective of this project is to improve my skills towards working with a team.

A user fills in a form with at least 5 items inside his/her fridge and the an API provides them with foods and recipes that they can cook using just what they have.

- Consuming an API that has been authenticated.

Technical Tools

JavaScript, React, MongoDB, NodeJS, Prisma and Mongoose
Python, Django, Flask, Ruby,
Ruby on rails, Active Records
PostgreSQL and Bootstrap

Technical Skills

Proficiency in JavaScript, HTML, CSS, and ReactJS
Experience with NodeJS and its related technologies, including Express, MongoDB, and RestAPI
Strong understanding of frontend and backend development

Ability to quickly learn and adapt to new technologies
Knowledge of Agile development methodologies and best practices for software development.
Proficiency in version control systems, such as Git.
Strong debugging and problem-solving skills.

Employment History

Technical Mentor, Moringa School, Kenya
March 2022 – TO DATE

Achievements and responsibilities:
- Learning new technologies to be able to deliver to students. This include ReactJs, Ruby and Ruby on rails
- Producing programmers who understand principles of development.
- Delivering simplified software development concepts to students.
- Mentoring students by guiding them in being technical, social and problem solvers.

Academic Qualification

Moringa School
Software Development Immersive Program, April 2021 - Nov 2021

Katelembo C.O.E High school
2015-2019
Kenya Certificate of Secondary Education
